

One Thousand Dollars In Gold Will Be Given Away By

To People Securing Subscriptions To

THE BISEE DAILY REVIEW

Before 9 p. m. Saturday, May 18, 1912

The \$1,000.00 Will Be Divided Into Seven Prizes As Follows:

First Prize	\$600.00 In Gold
Second Prize	\$200.00 In Gold
Third Prize	\$100.00 In Gold
Fourth Prize	50.00 In Gold
Fifth Prize	25.00 In Gold
Sixth Prize	15.00 In Gold
Seventh Prize	10.00 In Gold

Free Trip to Los Angeles will be given to some of the workers in the Circulation Contest who do not win one of the Cash Prizes

NOMINATION BLANK

Contest Manager,
Bisbee Daily Review;

Enter

Address

In the Circulation Campaign of The Bisbee Daily Review.

This blank will count 10,000 points for the person named on it if sent to the Contest manager of The Bisbee Daily Review, provided such person has not already been entered in the campaign.

For Full Information In Regard To This Great Prize Offer See The Contest Manager at the Review Office

PROSPECT IS FAR FROM BEING MINE

Difference Is Time and Money Are Needed for Development

There is all the difference in the world between a prospect and a mine. The most promising prospect will require several years of systematic and intelligent development, and the expenditure of several thousands before it can take rank as even a limited producer.

There are many who know but little about mining affairs who labor under the impression that if they have a prospect they have a mine. To a certain extent they might be right in their conclusions, but it will be an undeveloped mine that they own, and of no more present value, as far as the production of the present metals is concerned, than would so much vacant ground on the desert. It is true that a good prospect has a certain intrinsic value, and this value will have a fluctuating tendency, according as its merits may impress intending buyers; but it is not until the claim or group of claims, have been developed by means of shafts, tunnels, drifts, cross-cuts, winzes and upraises, and the ore bodies exposed and blocked out for measurement, that a prospect can rightfully be classed as a mine.

WE LOAD RIGHT UP.

the minute we receive order for lumber. We carry such a big stock that we can meet any requirement at a moment's notice. Order your next lumber here and you will have no delay on the job. That accounts a lot when the expense of idle mechanic is considered.

HENDERSON Lumber Co.
WATKINS

and its relative actual value be ascertained and demonstrated.

Good ground has value, but undeveloped, it is far from being a mine valuation. For this reason one of the best avenues for legitimate mine operation is to acquire a good prospect, develop it into a regular producer, when it can be passed up to heavy mining syndicates at a very handsome profit; and more money is often made by this method than can be acquired by a purchase of a mine with the expectation that it can be afterward sold at an advance over the purchase price. Every mine has a prospect, and its development into a paying proposition, into a mine worth its many thousands and even its millions, has invariably been attended by many hardships, many discouragements and many set backs. Perchance, during its development work it has changed hands a number of times, and it is quite possible that it has lost money for some of its various owners. But this cannot be charged up against the mine, but to bad management or lack of experience and ability. Every prospect will not make a mine. This would be a physical impossibility even if millions were spent in its development, and for the reason that the mineral is not there; or if present in such small quantities, or of such low grade that it is commercially valueless.

The Mining Review advocates the acquisition of a prospect rather than the investment of heavy capital in a developed mine. But, before a purchase of a prospect is made, it should be subjected to a most careful examination and report by a competent engineer and geologist. If these endorse the proposition and advise its purchase, the chances are that a few thousand dollars intelligently work a transformation that will give the mining industry a regular and a heavy producer, and a gift-edged dividend payer.

It is really wonderful the large number of promising prospects there are in this western country that are only awaiting the advent of capital for their development into bonanza propositions. The mountains are full of them and there are hundreds yet to be discovered. And yet, if a man lacks, patience, perseverance, good sound judgment, and a few thousand in the coin of the realm, he had better let the prospect alone and some occupation where his labor will bring him a regular income, as it is better that he should steer clear of mining than to engage in this fascinating and ultimately profitable pursuit, than he should make a beginning and not be able to follow the development of a prospect through its various stages until money and labor expended is rewarded by the giving to the world of a new wealth producer.—The Salt Lake Mining Review.

PIANIST

Wishes engagement for orchestra, dance, etc. Mrs. J. P. Sullivan, Phone 352, 87 School Hill.

Brief Local Items

If any lodge baseball team in the district reaches the championship of Bisbee for the season of 1912, it will be over the dead bodies of the Eagles. That lodge has organized a baseball team, and will issue the debt to other lodges of the district.

Returns from Canyon

Joe Leftault returned yesterday from Ash canyon, where he went to take a supply of rations and supplies to the development camps on the placer gold claims in the canyon.

Cups Purchased

Two silver cups for prizes in the Warren District billiard tournament have arrived, but there has been some delay in organizing the tournament, on account of the absence of Jack Rice from the city. Mr. Rice had agreed to organize the tournament.

Johnso Addition Wedding

George Lieber and Miss Almada Clark, both of Johnso addition, were united in marriage last night at the home of Mr. Warren in Johnso addition, the ceremony being performed by Rev. E. G. Decker, of the Methodist church. The wedding was attended by a large number of young people, and refreshments were served.

Funeral of Mrs. Jacobs

The funeral of Mrs. Sarah Jacobs, whose death occurred Monday afternoon, will be held at the residence in Lowell this morning at ten o'clock, conducted by Rev. J. E. Fry, and interment will be in Evergreen cemetery.

Toe Is Mashed

H. Kyle, a miner employed at the Holbrook shaft, was taken to his home at ten o'clock last night, suffering from a mashed toe, the injury having been inflicted by a falling rock.

Undergoes Operation

Miss Ollie Ballard, of Johnson Addition, underwent an operation at the C. and A. hospital early in the week, for appendicitis. Ernest George, also of Johnson Addition, was operated upon at that hospital for a like illness.

Scarlet Fever in Lowell

There are four cases of scarlet fever in Lowell, three cases, two girls and a boy in the Sponich family, and one, a little boy, in the family of Frank Thomas.

Many sufferers from rheumatism have been surprised and delighted with the prompt relief afforded by applying Chamberlain's Liniment. Not one case of rheumatism in ten requires any internal treatment whatever. This liniment is for sale by all dealers.

Arizona News Brevities

The ball game between the University of Arizona and the Normal at this place yesterday afternoon was the best exhibition of the season as is indicated by the score of 2 to 1 and the fact that errors on either side were few and far between, says the Tempe News. The only thing that Tempe has to regret is that the two end of the score belongs to the Tucson fellows. They are a fine bunch though, and there are no sore spots.

According to the Yuma Sun the farmers in the valley are bringing in many gopher skins. The county pays a bounty of five cents for each skin.

At Winslow the wool shipping season has opened. One man has shipped 18,000 pounds direct to a Boston firm that took the lot and another has shipped double the amount to the same firm. Mr. Sutton shipped 33,000 pounds that netted him about 29 cents in Arizona. Sheep shearing is going on all over the sheep district and the clip is exceptionally good.

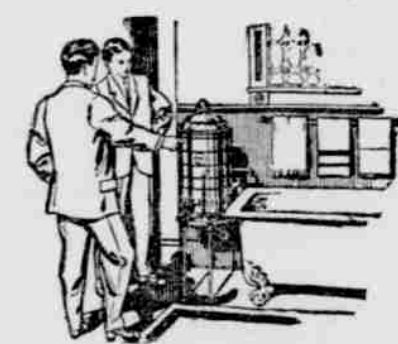

The first cause ever tried in Mohave county under the eight hour law came up before the justice's court on Kingman precinct Thursday last on a complaint from the Golconda mine. Maximo Avilas was accused of working a miner in his employ more than eight hours in one day. Avilas acknowledged that this was true and the court imposed the minimum fine of \$100. Avilas and another man had a contract to sink a shaft on the Golconda and it was in this work that the man was worked overtime.

James Murray, manager of the Hercules and Badger mines, at Chloride, is in Kingman on his way to Needles, where he will have a car load of ore from the mines sampled at the smelter, says the Kingman Miner. He reports that shafts have been sunk on both properties and that the ore bodies are showing up to great advantage. These mines were recently taken over from F. H. Crafts, who had been developing them the past three years. Several hundred tons of ore were shipped to the smelter by him, which netted him a large sum of money. The mines are among the best of the lead producers of the district, and with further exploitation should become large producers of ore.

Postmaster J. V. Proshaska, of Miami, has been selected as chairman of the executive committee of the Elks of Arizona. The committee's work will be connected mostly with the reunion next year and will be held in Globe.

Three buildings were burned at Radium last week. One had been used as a hotel, one as a saloon and one as a restaurant.

Hot Water--- All You Want--- Always Ready

The Ohio "M" Instantaneous Water Heater

With this heater installed in bathroom, you have an unlimited supply of hot water, always ready, day or night. No gas is burned until you begin to draw hot water and then you pay only for heating the amount of water you will use, whether this be a cupful or a tubful.

Made of copper, heavily nickel plated and handsomely finished, the Ohio "M" is an ornament any place. No offensive fumes and no danger in using the Ohio "M." It is easily installed, no vent pipes are required and the cost of operation is very little.

Call And See It Work

We have one of these heaters running in our office. No argument is necessary. Come in, try the heater and see what a convenient, economical hot water service it is.
